about me

MARÍA MORENA MIGLIORELLI

30 YEARS

ARCHITECT & INTERIOR DESIGNER

GRAPHIC DESIGNER

STATEMENT

I am an architect and interior designer with a multidisciplinary background that includes graphic design. I specialize in functional, high-impact spatial environments and commercial projects, from initial concept through to final materialization.

My career centers on interior architecture, retail, commercial and hospitality design — combining spatial awareness, structural planning and meticulous interior styling with a keen eye for visual communication.

A holistic perspective on spatial storytelling, from the first sketch to the last detail.

I actively incorporate Generative AI workflows into my process — streamlining ideation, accelerating spatial iterations and refining project assets.

work experience

2025 — 2026 · 1 YEAR

CMV Architects

ARCHITECT · PROJECT DESIGNER & SITE MANAGER · PALMA, MALLORCA, SPAIN

Project designer and site manager for commercial and hospitality architecture and interior design projects, from ideation to final delivery, including direct client relations and communication. Clients included Meliá, Senator, and Barceló Hotels.

2023 · 9 MONTHS

Togue Studio

GRAPHIC DESIGNER · EASTERN PENNSYLVANIA, USA

Conceptualized and produced creative assets for email marketing, social media, print collateral and brand identities within the studio.

2019 — NOW · 7 YEARS

TIZA Creative Studio

FOUNDER & CREATIVE DIRECTOR · GLOBAL

Founder and lead of an integral creative studio for graphic design, branding, and commercial and residential architecture and interior design, serving local and international clients.

2025 · 8 MONTHS

Interior Design Projects | New York Based

TIZA PROJECT · INTERIOR DESIGNER · NEW YORK, USA

Managed residential interior design projects, delivering tailored spatial solutions through high-quality 2D layouts, 3D modeling, and photorealistic renderings.

2023 — 2026 · 3 YEARS

Delta Children

SENIOR GRAPHIC DESIGNER · NEW YORK, USA

Lead packaging design projects within the department, collaborating closely with major global licensed brands such as GAP, Disney, Marvel, Jeep, Simmons and Bellini.

2021 · 1 YEAR

SVA Studio

ARCHITECT & INTERIOR DESIGNER · ROSARIO, ARG

Architectural and interior design and construction for the hospitality, residential and commercial sectors.

SUSTAINABLE SNOW HOUSE
HOUSING COMPLEXES
BOTANICAL GARDEN

01.1

sustainable snow house

–

TYPE	SINGLE-FAMILY HOUSE
STUDIO	TIZA CREATIVE STUDIO — FREELANCE
PROGRAM	LIVING, KITCHEN, STUDIO, LOFT
MATERIALS	TIMBER, BLACK METAL, GLASS

Sustainable Snow House, developed through my freelance studio, TIZA Creative Studio, is a compact mountain retreat drawn as a single pitched volume set against the range. Its envelope combines vertical timber cladding, black metal roofing and generous glazing, with roof skylights and a cantilevered eave that shelters the carport and filters the low winter sun. Inside, a double-height living space is organised around a central wood stove; a floating timber-and-steel stair rises to a mezzanine loft, and oak, stone and matte black repeat throughout. SIP panels give the roof optimal thermal insulation, and its snow-shedding pitch carries solar panels that make the house energy self-sufficient.

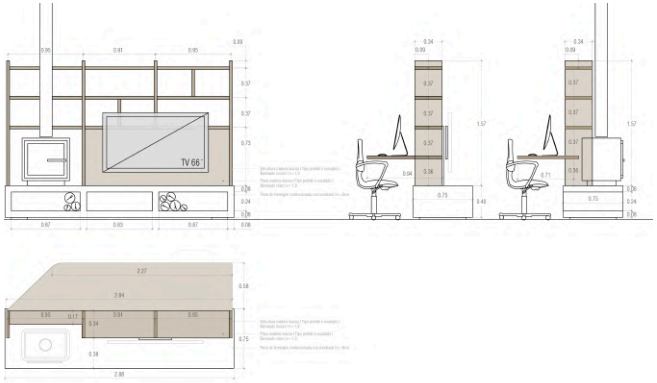

EXTERIOR

Vertical timber cladding, black metal roofing and a slatted eave over the carport.

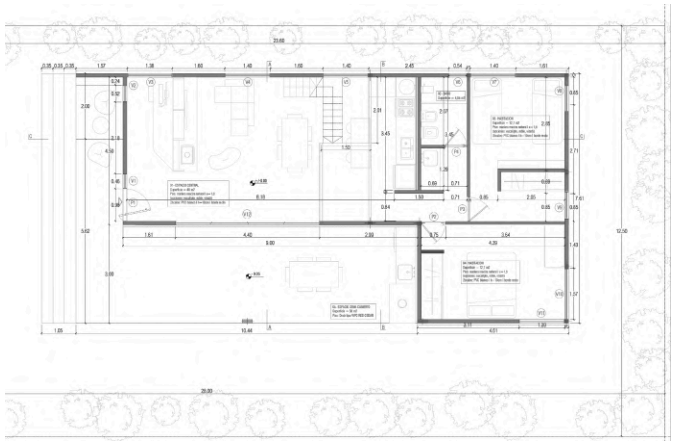

DESK & SHELVING UNIT — ELEVATIONS & PLAN · 1:25

DOUBLE-HEIGHT LIVING

Full-height glazing frames the mountains from the double-height living and dining room, crossed by a floating timber-and-steel stair. The custom desk and shelving unit, in dark- and light-varnished solid timber on a cast concrete base, integrates the wood stove, TV and firewood storage.

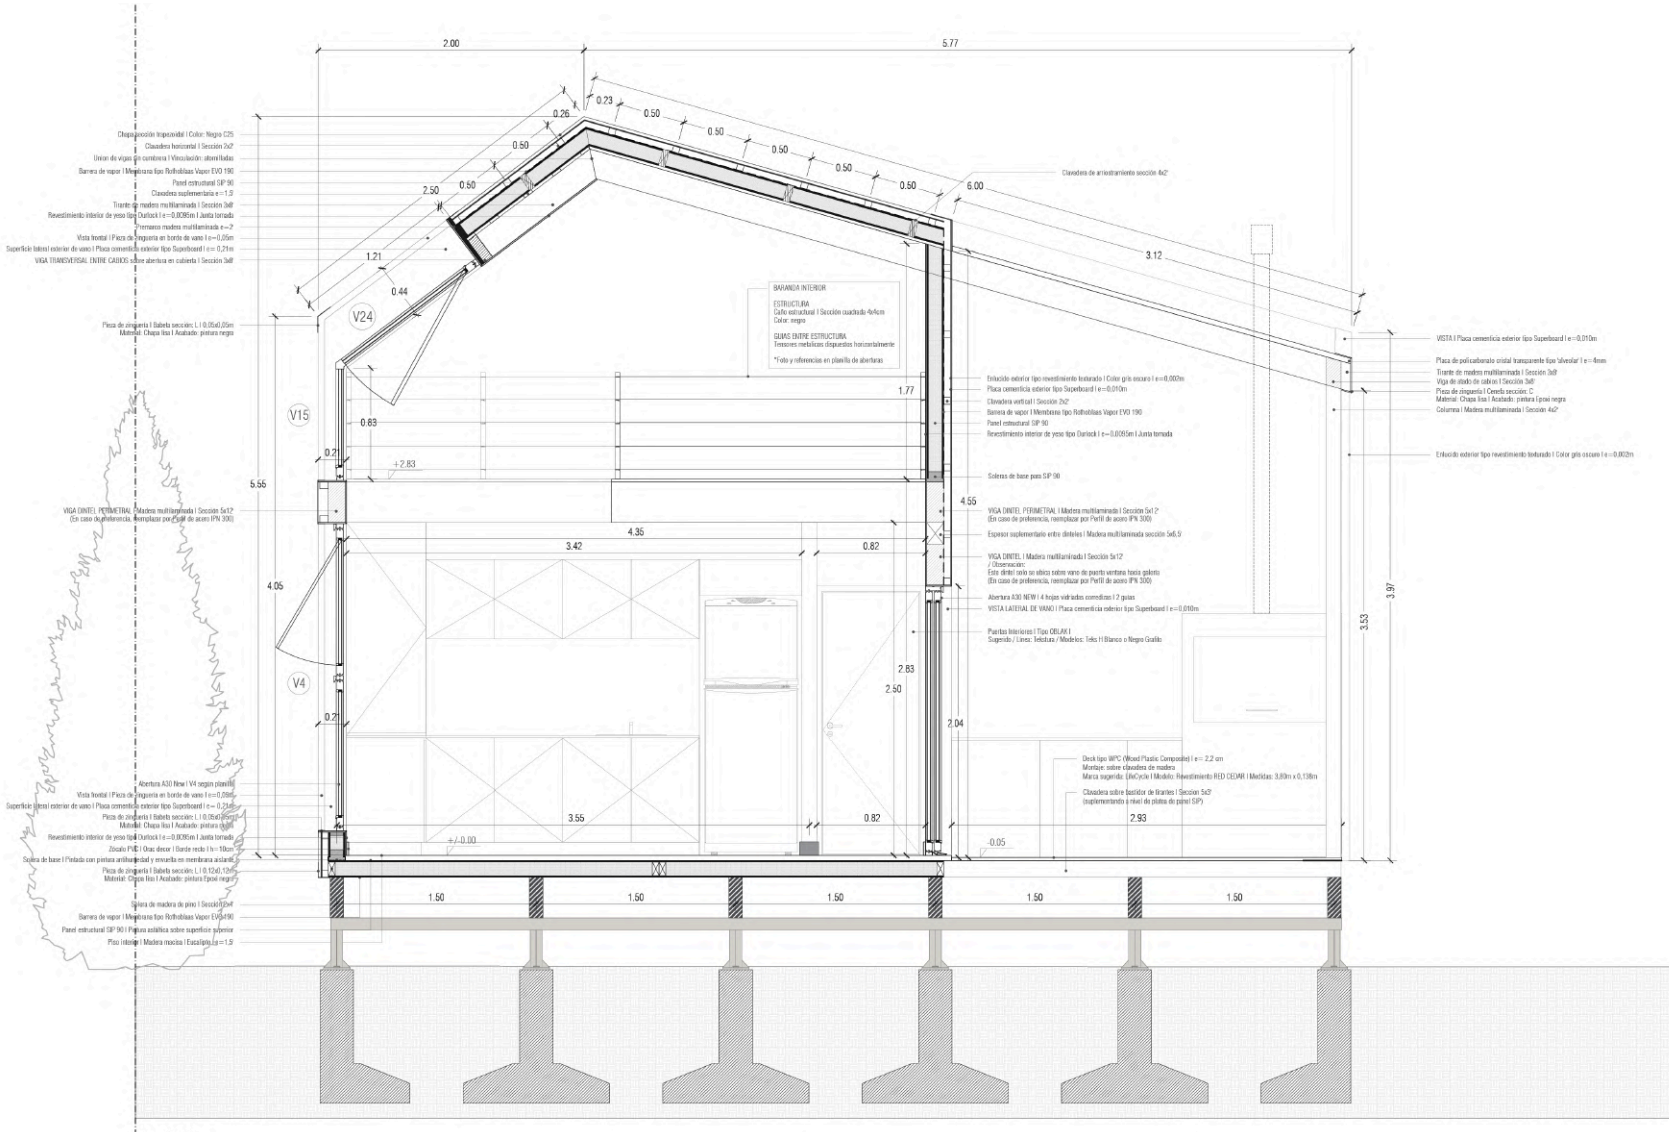

STUDIO & GROUND FLOOR

From the studio, an open oak shelving partition frames the living room, kitchen and mezzanine loft. The ground floor gathers living, dining and kitchen in a 40 m^2 central space, with two bedrooms, a bathroom and a 38 m^2 covered deck.

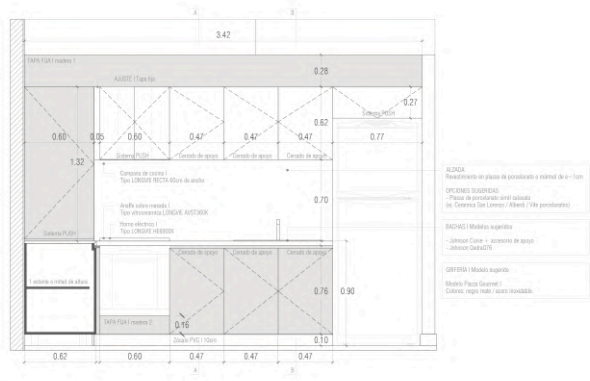

SUSTAINABLE SNOW HOUSE — SECTION A-A · 1:35

SIP 90 structural panels on a raised timber platform and isolated footings; trapezoidal metal roofing, Superboard cladding and a polycarbonate-covered gallery.

KITCHEN

Oak upper cabinets and matte black base units frame a travertine backsplash lit by a concealed LED strip. A solid travertine island with waterfall edges anchors the space, paired with dark timber stools.

BATH

Timber-lined shower with a frameless glass screen and stone-textured walls.

LOFT & ROOF

The mezzanine loft forms the upper floor of the house, open to the double-height living space below. The roof is built with SIP panels that provide optimal thermal insulation, and its steep pitch — needed to shed snow — was used to install solar panels, making the house energy self-sufficient.

01.2

housing complexes

—

LOCATION	PUEBLO ESTHER, ARGENTINA
TYPE	URBAN & RESIDENTIAL
CONTEXT	ACADEMIC · FINAL THESIS, UNR
YEAR	2021

An urban and residential project presented as the final course at the Faculty of Architecture, Planning and Design of the National University of Rosario. It addresses how to urbanize and populate a portion of the city, introducing orchards into self-sufficient social housing models adapted to four typologies — each with its own character and impact on the density of its territorial sector.

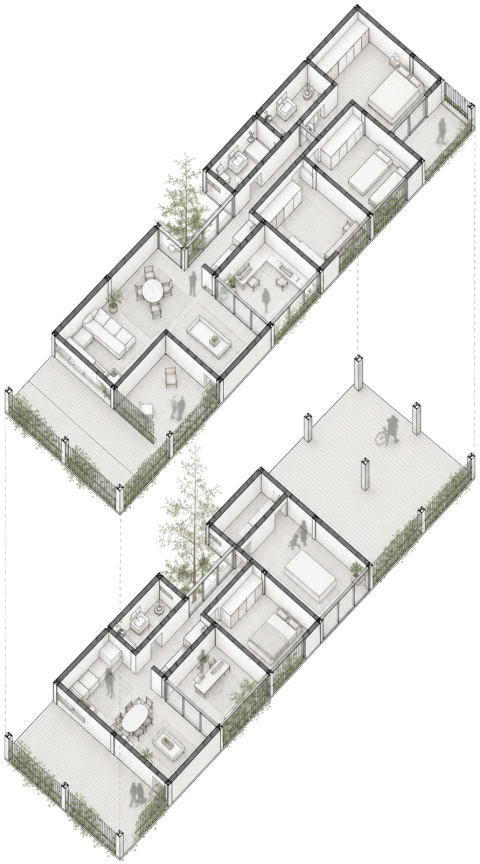

HOUSING COMPLEXES — STREET FRONT

Row typology along the street edge: a repeated modular frame, vertical lattices and climbing vegetation filter light and privacy.

DOMESTIC SCALE

Terraces, pergolas and private gardens extend each unit outdoors; shared green paths link the four typologies across the masterplan.

SHARED LANDSCAPE

Collective blocks open onto planted paths and lawns that tie the housing sectors together.

MIXED-USE BLOCK

STREET VIEW	RENDER
GREEN FACADE	ELEVATION

01.3

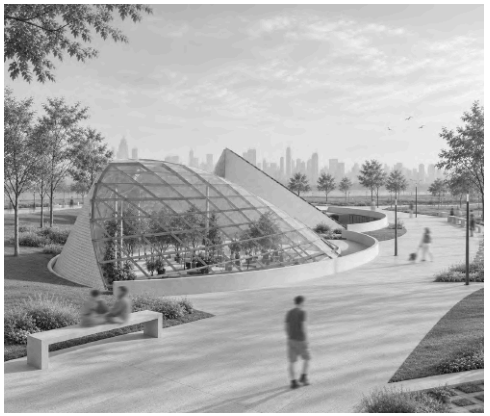

botanical garden

—

LOCATION	ROSARIO, ARGENTINA
TYPE	PUBLIC PARK & GREENHOUSES
CONTEXT	ALACERO CONTEST · ACADEMIC
PROGRAM	GLASS PAVILIONS, ATRIUM, PATHS

Conceived for the Alacero contest, the Botanical Garden reclaims a residual strip between highway and housing as a continuous public park. A single sinuous path threads a sequence of glass greenhouses of varying scale, each sheltering a distinct climate. The pavilions sink partially into the terrain, their steel-and-glass shells rising from earth berms, while a sunken colonnade links them below ground through light-filled atria. Native grasses and tree lines soften the edges, turning infrastructure into landscape and giving the city a place to learn, walk and gather.

SITE & GREENHOUSES

A continuous park between highway and housing links glass greenhouses of varying scale along a single sinuous path.

ATRIUM & COLONNADE

Sunken ramps lead below ground to a fluted-concrete colonnade that opens onto the greenhouses.

02.1

meliá tenerife

—

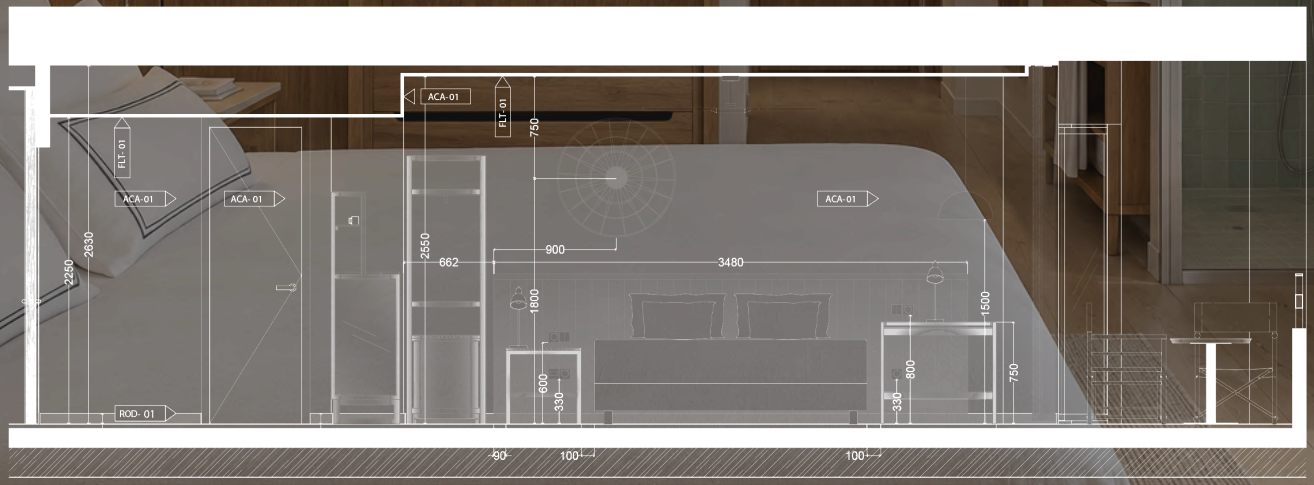

LOCATION	TENERIFE, CANARY ISLANDS, SPAIN
CLIENT	MELIÁ HOTELS INTERNATIONAL
STUDIO	CMV ARCHITECTS — PALMA DE MALLORCA
PROGRAM	GUEST ROOMS, BATHROOMS, CORRIDORS

Developed while working at CMV Architects in Palma de Mallorca, this project defines a Mediterranean interior for the guest rooms of the Meliá hotel in Tenerife — a design language conceived to be replicated across several of the chain's properties. Natural oak, woven rattan and linen meet soft sand tones, sage-green ceramic and brushed brass, while open joinery, wide glazing and sea-facing terraces bring light and landscape into each room. The result is a calm, relaxed atmosphere that is warm and local in character, yet standardised enough to be rolled out consistently from one hotel to the next.

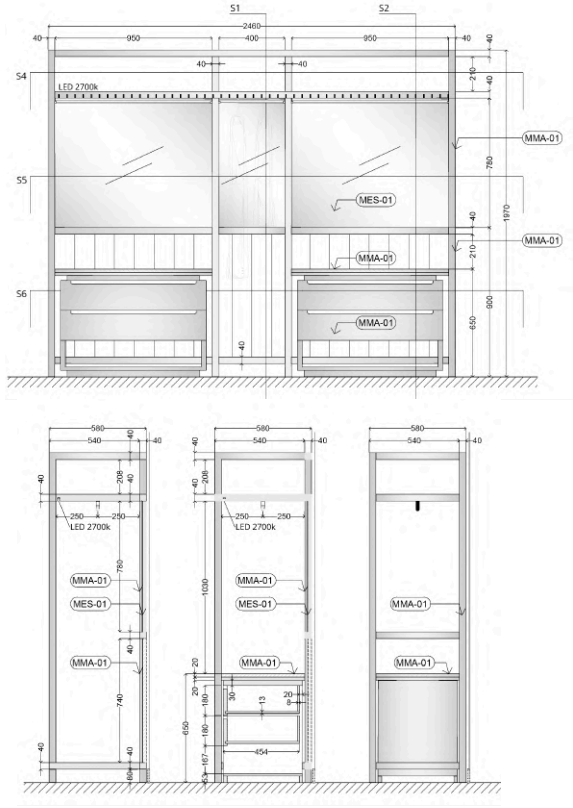

GUEST ROOM

Oak headboard and open wardrobe, rattan lighting and linen curtains frame the view of the sea from every room.

GUEST ROOM — SECTION

WARDROBE — ELEVATION & SECTIONS

OPEN WARDROBE

A freestanding oak frame with mirrored back panels, hanging rails lit by 2700K LED strips, drawer units with stone tops and an open shoe shelf.

DOUBLE VANITY — ELEVATION, SECTIONS & PLAN

BATH

Sage-green handmade tiles, an oak vanity with integrated towel rail and brushed brass fittings under a backlit mirror. The 1300 mm double vanity combines an oak frame and drawers with a terrazzo countertop and two undermount basins.

CORRIDOR — ELEVATIONS & PLAN

CORRIDOR

Oak doors and frames alternate with textured wall panels; brass disc sconces, ceiling lights and backlit room numbers guide guests along a woven runner.

02.2

esquina bakery

–

LOCATION	NOU LLEVANT, PALMA, SPAIN
TYPE	SPECIALITY BAKERY & COFFEE
STUDIO	CMV ARCHITECTS
YEAR	2025 — 2026

Esquina Bakery is taking shape as a new neighbourhood hub in Palma, transforming the ground floor of a residential building into a warm and authentic space that combines production and service through timeless, honest design. Noble materials, real textures and a neutral palette create a setting where functionality meets subtle elegance, offering a welcoming atmosphere that enhances daily life and strengthens the sense of community.

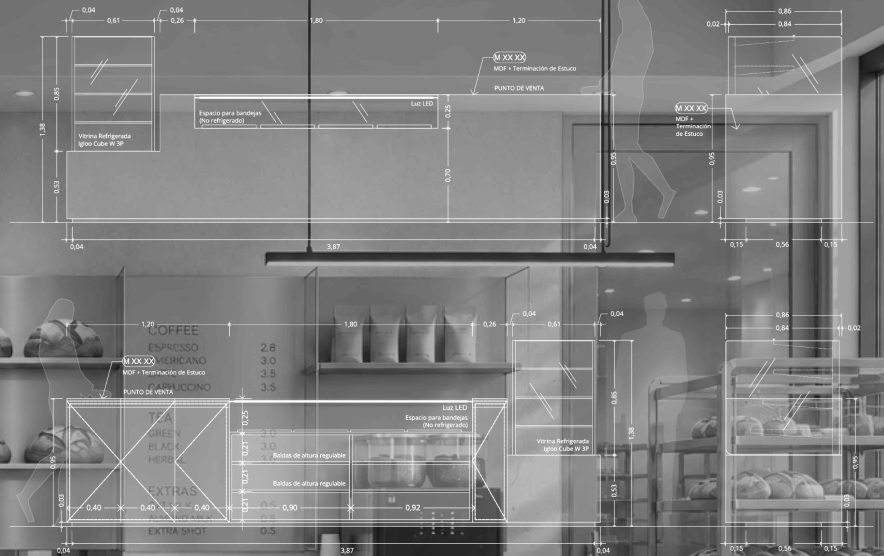

Situated within XO Palma Residences in the fast-growing Nou Llevant district — where modern living meets the Mediterranean lifestyle — Esquina Bakery will open as a speciality bakery and coffee shop, enhancing the area's lively, community-focused vibe.

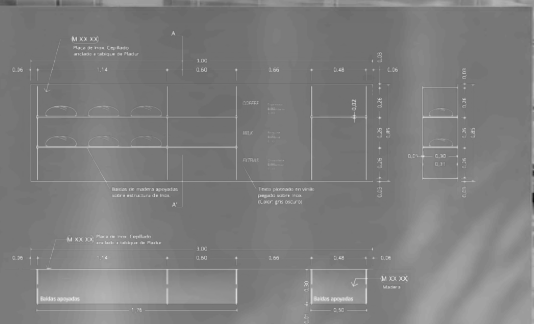

ESQUINA BAKERY — SHOP & SEATING

Seating and service share one luminous room: an upholstered banquette with oak tables faces the brushed steel pastry counter and the menu wall.

SERVICE COUNTER — FRONT & REAR ELEVATIONS, SECTIONS

BREAD SHELVING — ELEVATION, PLAN & SECTION

SERVICE COUNTER

Brushed stainless steel, open bread racks and a menu wall set in soft daylight. MDF counter with stucco finish, a refrigerated display and an LED-lit pastry case; behind it, wooden shelves on a brushed stainless steel wall display the bread.

BANQUETTE — PLAN, ELEVATION & SECTION

SEATING & BANQUETTE

A continuous timber-clad banquette wraps the glazed corner, facing the pastry display and the retail shelving.

GROUND FLOOR — TOP VIEW

Street-facing seating, central display counter and back-of-house bakery, with a corner terrace wrapping the plot.

02.3

medical center GO

–

LOCATION	FUNES, ARGENTINA
TYPE	HEALTHCARE · CORPORATE
STUDIO	SVA STUDIO

The interior concept for Medical Center GO is drawn from the grid of Charles Rennie Mackintosh's Hill House chair. Its slender orthogonal lattice becomes the project's single pattern, repeated across every screen, partition, joinery front and ceiling detail — from the tall timber lattices that filter daylight in the double-height entrance hall to the cabinetry of the boardroom and offices — and two Hill House chairs are built for the space itself. Around this grid, a restrained palette of oak, bronze-framed glass and dark veined stone, with soft upholstery and planted islands, replaces the clinical with a calm, domestic atmosphere.

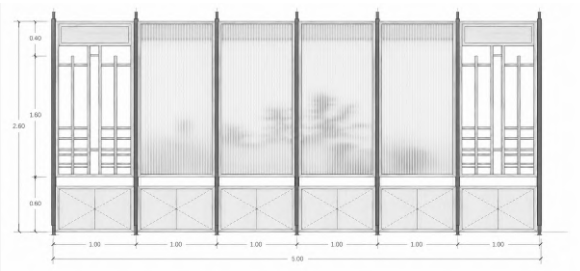

MEDICAL CENTER GO — ENTRANCE HALL

A double-height waiting hall open to the garden; timber lattices, soft upholstery and planted islands set a calm, domestic tone.

LATTICE PARTITION — ELEVATION

ENTRANCE & LOBBY

Bronze-framed glazing at the entrance; in the lobby, oak cabinetry, a stone-clad niche and a dark marble coffee counter open onto the garden. The elevation details the Hill House lattice partition.

STORAGE & ARCHIVE

Integrated oak storage walls, archive units and planted dividers between work areas.

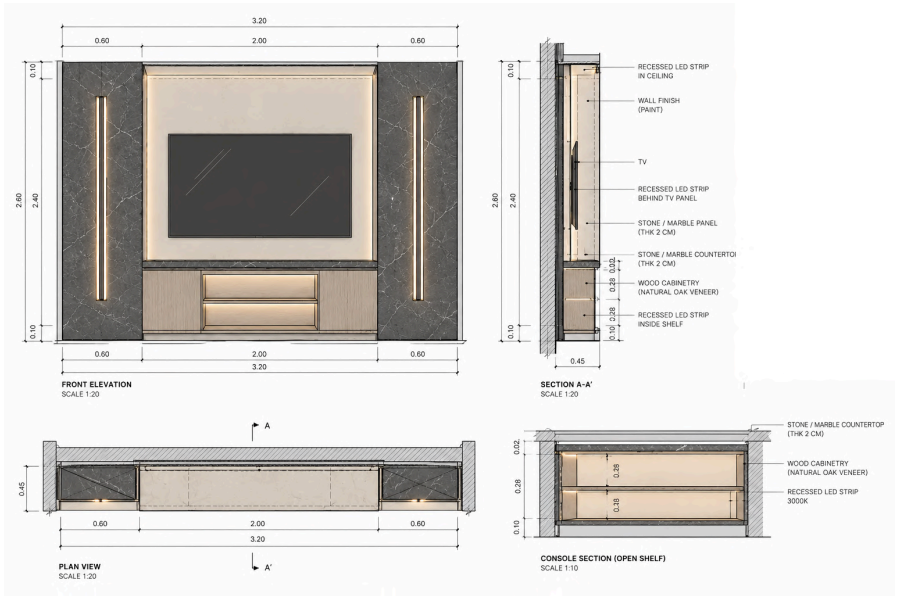

ADMINISTRATIVE OFFICES

Open workstations with acoustic burgundy screens and warm linear lighting over terrazzo floors.

TV WALL — ELEVATION, PLAN, SECTIONS & DETAILS

BOARDROOM

A daylit meeting room for the board, in oak and stone, where backlit dark stone pilasters frame an oak media wall.

02.4

gold house

—

LOCATION	NEW YORK, USA
TYPE	RESIDENTIAL APARTMENT
STUDIO	TIZA CREATIVE STUDIO — FREELANCE
PROGRAM	KITCHEN, DRESSING ROOM, BATH

Gold House is the interior design of an elegant New York apartment, developed through my freelance studio, TIZA Creative Studio, built on a warm palette of taupe, oak and brushed brass. The kitchen pairs shaker-profile joinery with a book-matched stone backsplash and a curved walnut island over chevron oak floors. In the main bedroom, a full wall of bleached-oak wardrobes frames a Calacatta marble fireplace, concealing a lit vanity and hanging storage behind flush doors. The bathroom continues in travertine, oak and brass, with fluted-glass enclosures for shower and WC — quiet luxury, detailed for everyday use.

KITCHEN

Taupe shaker joinery with brushed brass pulls and a curved walnut island over chevron oak. Details: a book-matched stone backsplash with a lit floating shelf, a brushed brass faucet over an undermount double sink, and oak-lined drawers.

KITCHEN — ELEVATIONS · 1:20

KITCHEN DRAWINGS

Cooktop wall, columns wall and island elevations: Calacatta countertops, natural oak panelling and brushed brass hardware.

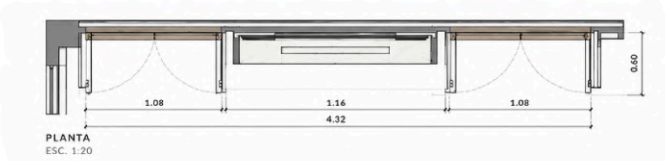

VISTA FRONTAL - ARMARIOS CERRADOS
ESC. 1:20

VISTA FRONTAL - ARMARIOS ABIERTOS
ESC. 1:20

PLANTA
ESC. 1:20

DRESSING ROOM — ELEVATIONS & PLAN · 1:20

DRESSING ROOM

Bleached-oak wardrobes frame a Calacatta fireplace; closed, flush panelling hides a lit vanity and hanging storage.

MIRROR & LIGHT

A brass-framed mirror paired with a slim glass tube sconce, giving soft, even light over the vanity.

BATH

Travertine, oak and brushed brass: an integrated travertine vanity over oak drawers with brass pulls.

SHOWER & BASIN

A fluted-glass shower door with a brushed brass pull, and a brass faucet over the integrated travertine basin.

BATH — ELEVATIONS · 1:20

02.5

corporate office

TYPE	EXECUTIVE OFFICE · INTERIOR
STUDIO	TIZA CREATIVE STUDIO — FREELANCE
PROGRAM	OFFICE, MEETING LOUNGE
MATERIALS	OAK, SMOKED GLASS, LINEN

A private executive office designed through my freelance studio, TIZA Creative Studio, as a quiet, enveloping retreat. Oak panelling and fluted slats wrap the room, integrating storage, a media wall and concealed linear lighting. Sheer linen curtains soften daylight over a stone-topped desk, while a fluted-glass sliding partition separates the work area from a small lounge — sharing light while preserving acoustic privacy. Smoked-glass shelving, sculptural lighting and planted corners complete a warm, tailored setting for work and conversation.

CORPORATE OFFICE — MEDIA WALL

Oak cabinetry with backlit fluted slats frames the TV, open shelving and a stone-topped meeting desk, under warm linear lighting.

WORK & LOUNGE

A fluted-glass sliding partition separates the desk — a textured stone top on a slim black steel frame — from a private lounge, sharing daylight while keeping acoustic privacy. Smoked-metal shelving with concealed warm lighting is set into the oak joinery.

CORPORATE OFFICE — LOUNGE

A linen sofa and soft seating behind the fluted-glass partition.

03

BACCHI ARQUITECTURA
COSTHOM

Graphic Design

Branding, visual identity, stationery and social media.

03.1

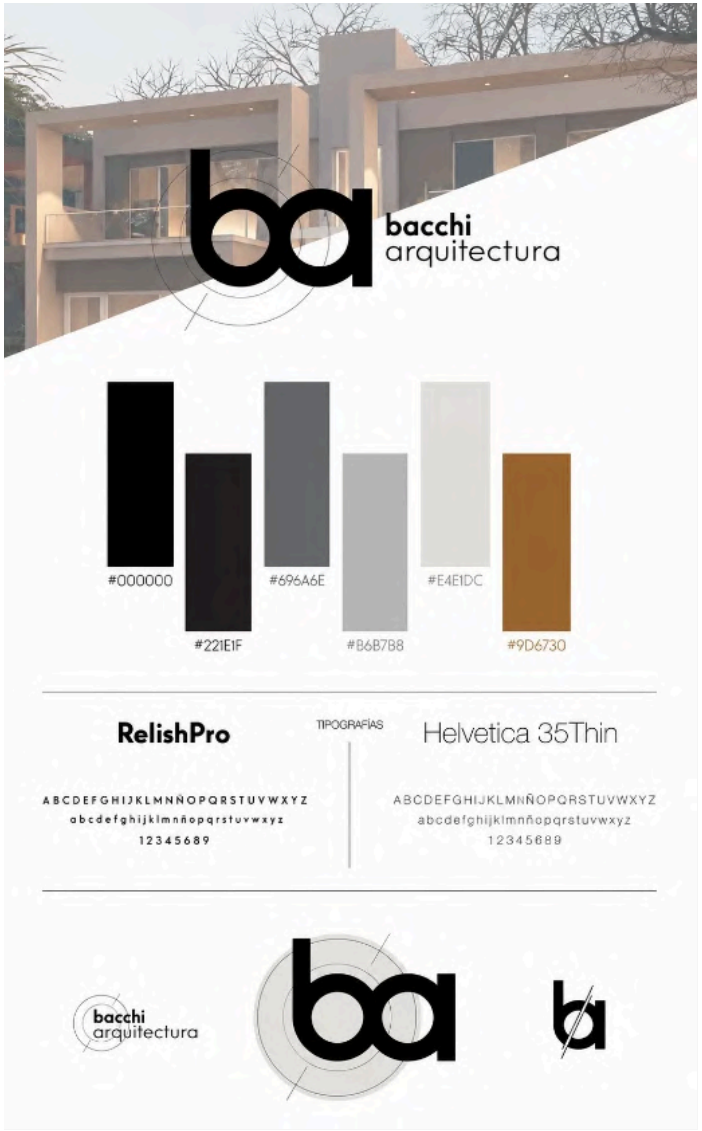

bacchi arquitectura

–

CLIENT	BACCHI ARQUITECTURA — GRUPO BACON
STUDIO	TIZA CREATIVE STUDIO
SCOPE	BRANDING, STATIONERY, SOCIAL MEDIA
LOCATION	SANTA FE, ARGENTINA

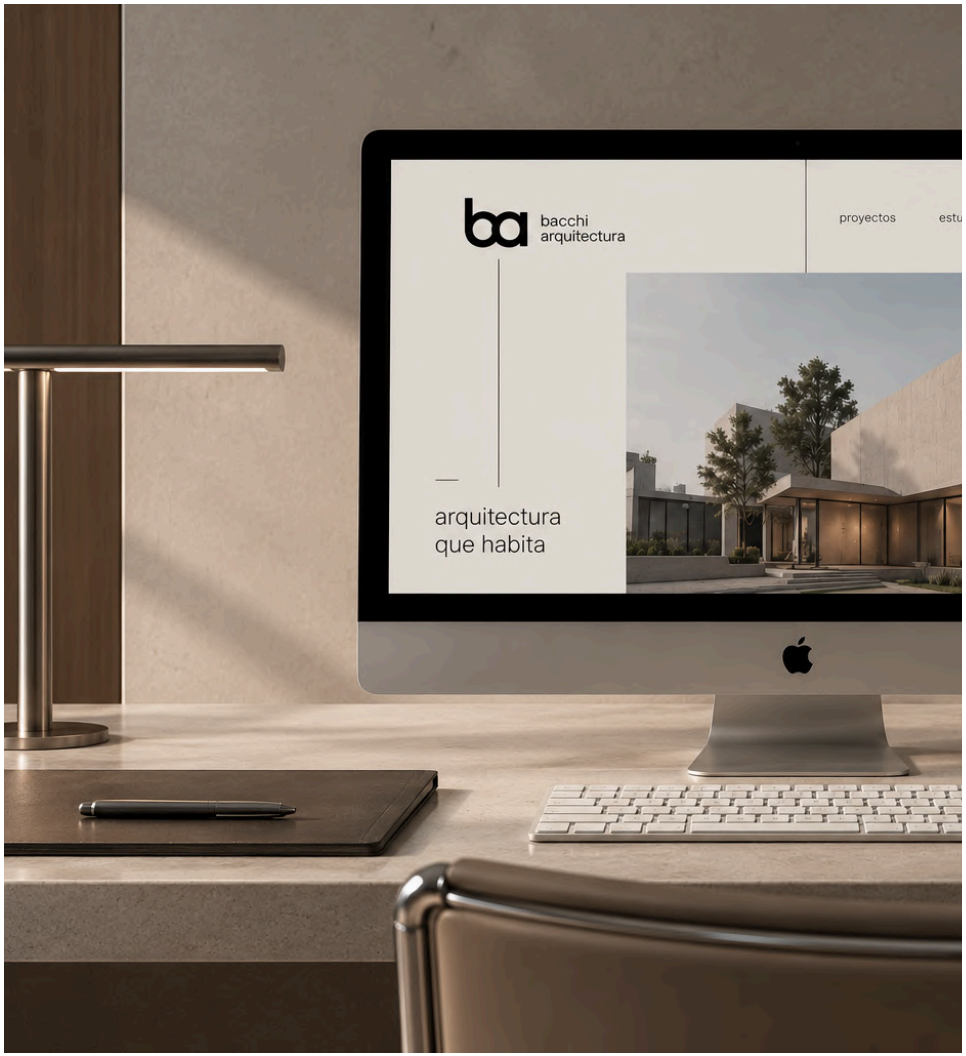

A visual identity for an architecture studio and construction company. The monogram fuses a lowercase b and a into a single geometric form, drawn over construction circles and a diagonal stroke borrowed from the drafting table. A restrained palette of black, greys and bone, accented by a single bronze tone, and a pairing of RelishPro with Helvetica Thin carry the system across print and digital.

TYPOGRAPHY & BUSINESS CARDS

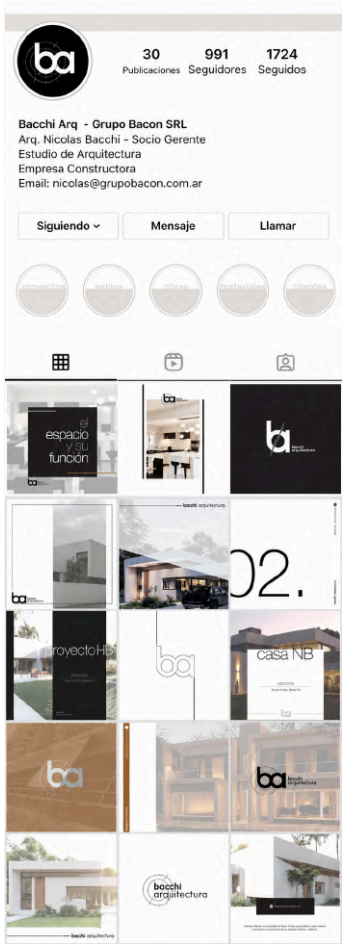

RelishPro and Helvetica 35 Thin set the typographic system; the business cards pair the monogram with a black field.

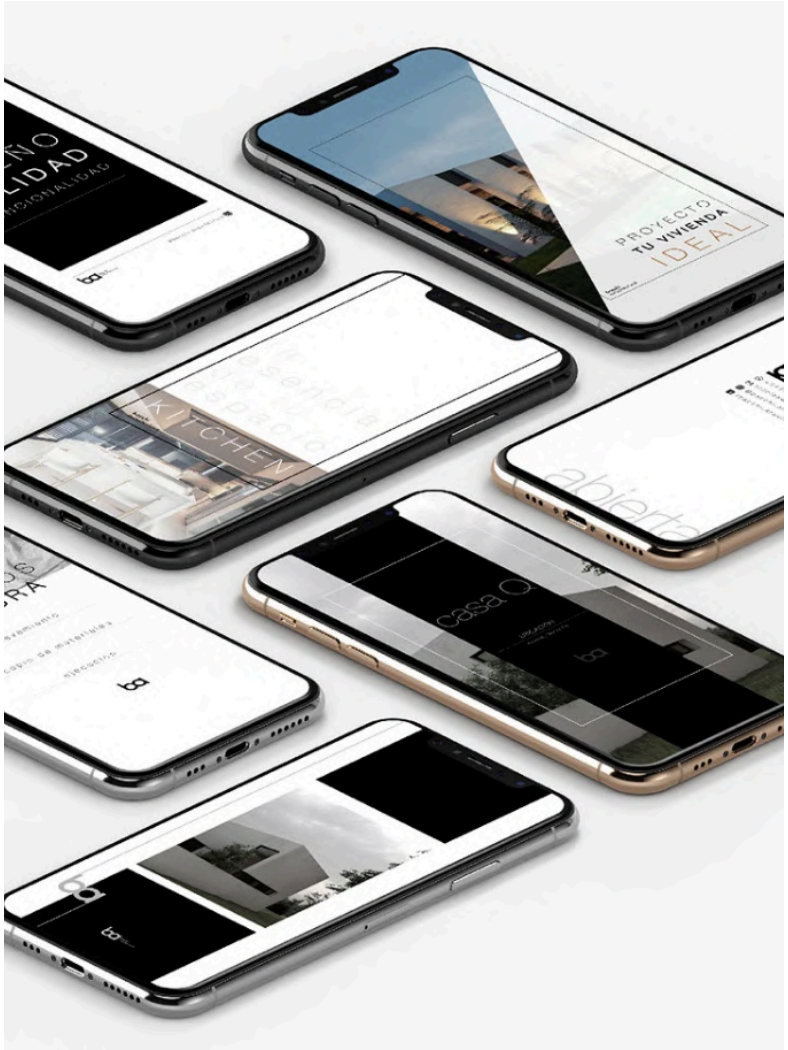

WEB & STATIONERY

The website on desktop; presentation folder and letterhead split by a black field, echoing the curve of the mark.

SOCIAL MEDIA

An Instagram feed of project posts, typographic covers and highlights in the brand palette.

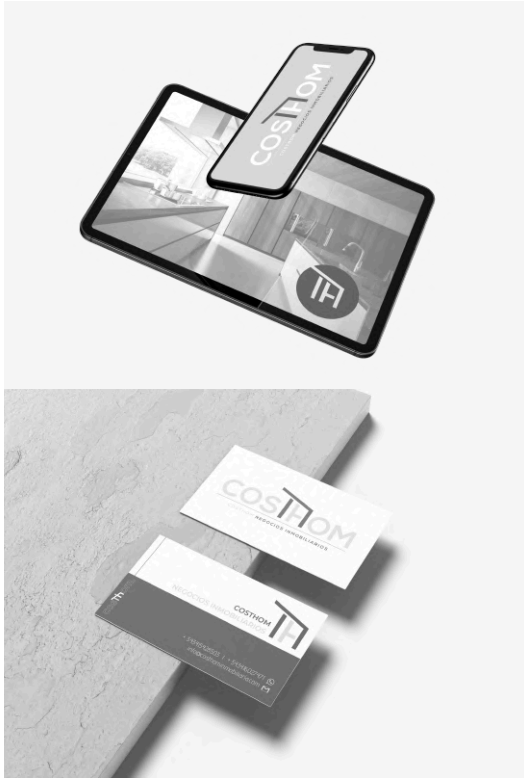

03.2

costhom

CLIENT	COSTHOM NEGOCIOS INMOBILIARIOS
STUDIO	TIZA CREATIVE STUDIO
SCOPE	BRANDING, STATIONERY, SOCIAL MEDIA

A visual identity for a real estate agency. The mark turns the T and H of the name into a house in section: a single sloped roof line resting on two walls, set into a geometric sans wordmark. A quiet palette of bone, light grey, graphite and black, paired with Montserrat and Advent Pro, carries the brand from business cards to digital screens, and a set of line illustrations — search, sale, keys — gives the social media system its own voice.

MOODBOARD & APPLICATIONS

Bright interiors, oak floors and dark stone kitchens set the brand's five-tone palette. The logo and isotype carry onto screens and business cards.

FEED

Post templates combining photography, colour blocks and the brand illustrations for sales, rentals and investment services.
